### ACADEMIC PROJECTS

#### Course Management System

Feb – Apr 2014

(Guide : Mr. Samrat Mondal , Department of CSE)

- Developed an Academic model in a team which aimed at facilitating functionalities like discussion forum, opinion polling, course attendance and academic calendar.
- The project aimed at helping both the student and teacher fraternity by providing a platform for addressing all academic related queries which are faced in the practical scenario.
- Managed the back end operation including the database and testing part.
- Used Django framework along with MYSQL, CSS and HTML.

#### Railway Stall Locator Android App

Oct – Nov 2014

- Conceived, designed and build a demo app in a team which would help facilitate railway passengers in locating a food stall located on the upcoming stations and filter the results based on parameters like best rated stall and nearest one. The passengers can later provide their feedback regarding the food item which is stored in a database.
- Tested the app with a reasonable number of users and made suitable changes based on their suggestions.
- Used the standard android APIs.

### EDUCATION HISTORY

2012 – 2016(Expected)	<b>Indian Institute of Technology , Patna</b>	<b>8.25/10</b> (over 5
	Bachelor of technology , Computer Science and Engineering	semesters)
